

Arts & Bots Interview Questions

To identify the "story" behind each robot, try to cover the following points, and develop the ones that sound more interesting for each specific interviewee. Of course, if anything else comes up in the conversation that is interesting and not part of these points - dig deeper.

- ❖ Tell me about how your robot works – what electronic parts did you use and what do they do?
- ❖ Identify decisions made (materials, technology, programming, story)
- ❖ What did you enjoy the most about this process, what was the most rewarding part of the experience? Why? How so?
- ❖ What was the most challenging part of this assignment for you? Why? How did you overcome / resolve it?
- ❖ What did you learn from this project (about robotics and the curricular topic)?
- ❖ Show / describe the robot doing its thing (+ the assignment if relevant)
